INTRODUCING

MIRRORA™

LIGHT
WITHOUT LIMITS

MIRRORA™ is a flexible architectural lighting and decorative surface system created for designers who want to transform light into form.

Its flexible translucent construction allows designers to create flowing curves, waves, spirals, suspended sculptures, illuminated partitions and customized ceiling compositions.

Unlike conventional linear lighting, **MIRRORA™** becomes an architectural feature itself—combining form, surface, graphics and programmable illumination into one integrated design element.

DESIGNED FOR:

BANQUET
HALLS

HOTELS

RESTAURANTS

MALLS

LUXURY
RETAIL

CLUBS

RESORTS

LOBBIES

EVENT
SPACES

ELEVATED LIVING LLP

FROM FLAT CEILINGS TO FREE-FORM LIGHT

Architecture does not have to remain straight.

MIRRORA™ enables designers to explore:

-  Organic waves
-  Continuous curves
-  Large illuminated loops
-  Spirals
-  Floating ribbons
-  Sculptural ceiling forms
-  Vertical light features
-  Decorative partitions
-  Suspended installations
-  Custom architectural shapes

One Flexible System. Unlimited Forms.

MIRRORA™ FOR
**BANQUET
HALLS**

**MAKE THE CEILING
PART OF THE
CELEBRATION**

Create dramatic ceiling installations for weddings, receptions, corporate functions and luxury events.

MIRRORA™ can form oversized illuminated waves, rings and sculptural compositions above the ballroom.

With dynamic RGB/RGBW or pixel-controlled lighting, the ceiling atmosphere can change according to the event.

MIRRORA™ FOR
HOTELS

**A SIGNATURE
ABOVE EVERY SPACE**

MIRRORA™ gives hotels an opportunity to create a recognizable architectural lighting identity.

IDEAL FOR:

-  Hotel Lobby
-  Reception
-  Atrium
-  Lounge
-  Ballroom
-  Corridor
-  Spa
-  Restaurant
-  Bar
-  Presidential Suite
-  Resort Reception

Custom printed surfaces can also integrate artwork, patterns and visual themes into the illuminated structure.

LIGHTING OPTIONS

ONE FORM. MULTIPLE MOODS.

**3000K — WARM WHITE**

Warm, luxurious illumination suitable for hotels, restaurants and banquet spaces.

**4000K — NEUTRAL WHITE**

Balanced architectural illumination for contemporary interiors.

**6000K — COOL WHITE**

Bright modern appearance suitable for commercial environments.

**RGB / RGBW**

Multiple colour combinations with controller-based operation.

**DYNAMIC / CHASING LIGHT**

Sequential lighting effects for entertainment and event applications.

**DMX / PIXEL CONTROL**

Programmable scenes, movement and synchronized architectural lighting effects.*

MIRRORA™ FOR
**SHOPPING
MALLS**

**LARGE-SCALE LIGHTING
FOR LARGE-SCALE
ARCHITECTURE**

Designed for visually demanding commercial environments, **MIRRORA™** can become a signature attraction within shopping malls.

IDEAL LOCATIONS

-  Atriums
-  Main Entrances
-  Food Courts
-  Luxury Retail Zones
-  Escalator Voids
-  Entertainment Areas
-  Corridors
-  Brand Activation Zones

 Large suspended compositions can create visual movement across expansive architectural spaces.

TURN LIGHT INTO ART

MIRRORA™ can incorporate customized decorative graphics where the selected material and system configuration permit.

POSSIBLE ARTWORK INCLUDES:

-  Patterns
-  Abstract Art
-  Nature
-  Heritage Artwork
-  Hotel Graphics
-  Restaurant Themes
-  Corporate Branding
-  Logos
-  Customized Designs

Printing combined with illumination creates a completely different visual character during day and night.

Design It. Print It. Illuminate It.

TRANSFORM YOUR SPACE

FORMS & CONFIGURATIONS

DESIGNED AROUND
THE ARCHITECTURE

MIRRORA™ can be developed into multiple architectural configurations:

MIRRORA™
WAVE

Flowing ceiling compositions that create movement and elegance.

MIRRORA™
RIBBON

Long suspended illuminated forms that define spaces with continuity.

MIRRORA™
LOOP

Circular and elliptical structures that become a central architectural focus.

MIRRORA™
SPIRAL

Sculptural hanging installations that create vertical movement.

MIRRORA™
WALL

Illuminated vertical features for walls, columns and architectural highlights.

MIRRORA™
PRINT

Customized graphical surfaces integrating artwork, patterns and visual themes.

MIRRORA™
RGB

Colour-changing installations with multiple RGB/RGBW options.

MIRRORA™
DYNAMIC

Programmable and chasing lighting effects for immersive experiences.

MIRRORA™ COLLECTION – LIGHT THAT ADAPTS TO YOUR VISION

WHY MIRRORA™

BEYOND DECORATIVE LIGHTING

MIRRORA™ combines several design possibilities within one architectural system — giving designers freedom, performance and beauty in one flexible solution.

**FLEXIBLE FORM**

Bend, curve and shape into endless architectural possibilities.

**INTEGRATED ILLUMINATION**

Uniform, soft and glare-free illumination across the entire surface.

**CUSTOM GEOMETRY**

Create unique shapes, curves, loops and complex architectural forms.

**LARGE-SCALE INSTALLATION**

Engineered for large spaces and high-impact architectural environments.

**CUSTOM PRINTING**

Integrate artwork, patterns, branding and themes into illuminated surfaces.

**MULTIPLE WHITE TEMPERATURES**

3000K, 4000K, 6000K options to match the ambience and design intent.

**RGB / RGBW OPTIONS**

Full range of colours to create moods, ambience and brand experiences.

**DYNAMIC LIGHTING**

Chasing, fading, colour transitions and dynamic effects for immersive environments.

**DMX INTEGRATION**

Pixel or DMX control for programmable scenes and synchronized lighting experiences.

**SUSPENDED DESIGNS**

Elegant hanging installations that float light through the space.

**VERTICAL APPLICATIONS**

Use on walls, columns and vertical surfaces to enhance spatial architecture.

**BESPOKE PROJECT DEVELOPMENT**

Custom engineered solutions tailored to your project requirements.

MIRRORA™

TECHNICAL DATA SHEET

MIRRORA™
PRELIMINARY TECHNICAL DATA

PARAMETER	SPECIFICATION
Product	MIRRORA™
Category	Flexible Illuminated Architectural Surface System
Application	Ceiling / Suspended Feature / Wall / Partition / Decorative Installation
Form	Flexible / Curved / Wave / Spiral / Free-Form
Surface	Translucent Decorative Surface
Lighting	Integrated LED System
White Light Options	3000K / 4000K / 6000K*
Colour Lighting	RGB / RGBW*
Dynamic Lighting	Chasing / Programmable Effects*
Control	Remote / Controller / DMX-compatible configuration*
Custom Printing	Available on compatible surface configurations*
Installation	Project-specific supporting/profile system
Shape	Customized according to approved design
Dimensions	Project specific
Power Supply	Selected according to LED configuration and project load
Indoor Application	Yes
Maintenance Access	To be incorporated according to project design
Design Service	Custom project engineering available

*Final specifications depend on the selected configuration, lighting hardware, material and approved project design.

 RGB / RGBW OPTIONS

 DMX CONTROL

 RELIABLE PERFORMANCE

CONTROL & AUTOMATION

CONTROL THE ATMOSPHERE

Depending upon project configuration, **MIRRORA™** can be integrated with advanced lighting control systems.

STATIC WHITE

Consistent and elegant white illumination.

DIMMING

Smooth dimming from 0–100% brightness.

COLOUR SELECTION

Select from a wide range of colours to suit any mood.

RGB / RGBW SCENES

Create custom scenes with multiple colours and intensities.

DYNAMIC EFFECTS

Program flowing, breathing, fading and other dynamic light iterations.

CHASING EFFECTS

Sequential lighting for movement and visual rhythm.

DMX PROGRAMMING

Advanced DMX control for precise programming and synchronization.

EVENT-BASED LIGHTING SEQUENCES

Automated lighting sequences for events, occasions and time-based operation.

For banquet halls and hospitality projects, **multiple programmed scenes** can be developed for different occasions.

DESIGN TO INSTALLATION

FROM CONCEPT TO ILLUMINATED ARCHITECTURE

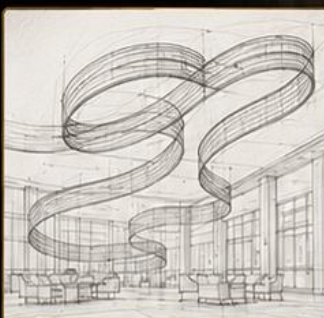

A streamlined process that transforms ideas into customized illuminated architecture with precision and perfection.

01 SITE STUDY

Understand dimensions and architectural conditions.

02 CONCEPT DEVELOPMENT

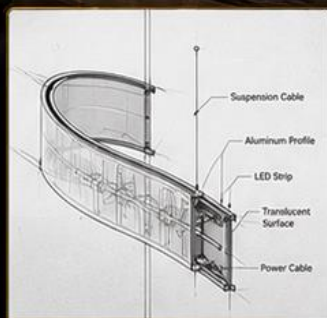

Develop the visual form and application.

03 3D DESIGN

Preview the proposed installation.

04 ENGINEERING

Finalize support, profiles, electrical and lighting requirements.

05 FABRICATION

Prepare the customized components.

06 LIGHTING INTEGRATION

Install the selected LED/control system.

07 INSTALLATION

Assemble and shape the system on site.

08 PROGRAMMING & HANDOVER

Configure applicable lighting scenes and complete final testing.

YOUR VISION. OUR EXPERTISE. ILLUMINATED REALITY.

ARCHITECT & DESIGNER
COLLABORATION

YOUR VISION. OUR SYSTEM.

MIRRORA™ is a custom project architectural lighting system — not a standard ceiling. It is designed, engineered and built around your vision.

NOOH CAN COLLABORATE ON:

 CONCEPT DEVELOPMENT From idea to inspiring concept. We help shape your vision.	 SHAPE DEVELOPMENT Custom forms designed to compliment your architecture.	 3D VISUALIZATION Photorealistic previews to help you visualize the final experience.	 LIGHTING PLANNING Perfect illumination planned for mood, function and day-night impact.	 CUSTOM PRINTING Unique artwork, patterns and branding integrated with illumination.	 STRUCTURAL COORDINATION Supporting systems engineered for safety, elegance and reliability.
 ELECTRICAL COORDINATION Seamless integration of power, control and data systems.	 FABRICATION Precision fabrication using high-quality materials and advanced methods.	 INSTALLATION Expert installation with attention to detail and site perfection.	 PROGRAMMING Scene creation, control setup and dynamic effects programming.	 PROJECT EXECUTION End-to-end project management delivering a flawless experience.	

FROM SKETCH TO REALITY

DESIGN. VISUALIZE. REFINED.
